Friday's Expreſs.

LONDON, THURSDAY, *Auguſt* 8.

Neither the Hamburgh mail due on Sunday laſt, nor that which became due yeſterday morning, have arrived.

Yeſterday evening arrived Paris papers to the 4th inſtant: They contain nothing intereſting; not a ſyllable reſpecting the fleets, and very little from the contending armies. Suwarrow has obliged the citadel of Aleſſandria to offer terms of capitulation; he was, however, ſtill engaged in beſieging the place, the articles not being to his ſatisfaction.

The embargo which has been laid, and which we underſtand is general, is ſo ſtrict that even the paſſage veſſels to Margate are not ſuffered to proceed on their voyages; ſeveral were ſtopt yeſterday at Graveſend, as the principal object is to prevent any intelligence getting to ſea reſpecting the ſailing of the grand armament.

This ſtrong meaſure is taken principally with a view to ſit on ſuch a ſquadron in the channel as may be able to hold the enemy in check, till the fleet of Lord Keith arrives, which is thought to be in cloſe purſuit of the French and Spaniards, who, it now appears, ſailed from Cadiz on the 21ſt of July. Capt. Wickey, of the Cambridge man of war, who arrived at the Admiralty on Monday evening, was the bearer of this important intelligence.

He came in the Triton frigate, which brought the further information reſpecting the French and Spaniſh fleets, which will be found in the article Plymouth (for which ſee below).—Apprehenſions, it appears, are entertained, that the enemy are bound immediately for Ireland; it is not, however, probable that that country is their immediate object; for, as we have before obſerved, the ſtate of the Republic is not ſuch as to encourage a ſuppoſition that a ſufficient military force is on board the fleets to undertake any expedition of conſequence.—It is likely they will proceed firſt to Breſt or Rochfort.

It is ſuppoſed nearly thirty ſail of the line will be ready for ſea in the channel in a few days, including the ſquadron under Rear-Admiral Pole, which has returned from Rochfort, and ſeveral ſhips have ſailed for Torbay, where the channel fleet is directed to aſſemble, and where Lord Bridport has already hoiſted his flag.

The Admiralty and Earl St. Vincent are ſaid to be not upon the beſt terms; and various whiſpers are in circulation upon the cauſe of miſunderſtanding.

THE SECRET EXPEDITION.

The guards began to embark on Tueſday on board tranſports, with the deſign of proceeding immediately on the ſecret expedition, in conjunction with a great body of other troops. The moſt formidable preparations have been made, notwithſtanding the probable approach of the enemies fleets, and it ſeems that the expedition will ſail in the courſe of this week. The exertions on the river within the laſt few days have been very extraordinary, ſuch as are well calculated to give an idea of the magnitude of the object, and the effort that will be made to inſure ſucceſs. Between 1 and 200 colliers, fiſhing boats, and coaſters of all ſorts, almoſt every ſo veſſel, have been ſeized to tranſport troops, horſes, ſtores, &c.; and the workmen in Woolwich Dock-yards have been called off other objects, to render them tight and ſea worthy.—But even for this the common number of carpenters have been found inſufficient, and others, at very advanced wages, have been engaged. Upwards of 500 veſſels of different ſorts, employed in this enterprize, have dropped down the river for different ports.—No place of general rendezvous is yet publicly known, but the Downs will probably be the ſcene of aſſembling and departure.

More than 300 baggage-waggons have reached Woolwich, from Portſmouth, within the laſt few days; and a very conſiderable number of heavy and light-horſe artillery, ſtores (among which are a remarkably large quantity of horſe-artillery), ammunition, &c. have been already embarked. No women are allowed on board, and the ſhips are only proviſioned for three weeks, ſo that their deſtination cannot be far diſtant.

An expreſs arrived at Woolwich yeſterday ſe'nnight, about ſix o'clock in the evening, and the men were employed, during the following night, in ſmiſſling ſome gun boats, which went down to Sheerneſs the next day; and in completing 200 flat bottomed boats, made on ſuch a conſtruction, that they can be taken to pieces and put together again with the greateſt facility. All is activity, chearfulneſs and zeal, in every department.

Plymouth, Auguſt 4.—Laſt evening, after poſt, arrived in the Sound his Majeſty's ſhip Triton, of 32 guns, Capt. Gore, from the Mediterranean, but laſt from off Cadiz. Cruiſing on the 21ſt ult. off Cadiz, in company with the Emerald frigate, ſaw the combined French and Spaniſh fleets, conſiſting of 40 ſail of the line and 16 frigates, put to ſea from thence: they ſteered a N. W. courſe in order to double Cape St. Vincent, from which circumſtance, not a doubt is entertained but their deſtination is Ireland. Capt. Gore immediately diſpatched the Emerald to Gibraltar, in queſt of Lord Keith, and crouded all ſail himſelf for England, with this important information for Government.

Singular occurrence.—On the 20th ult. a great quantity of young herrings ſeil, during a very heavy ſhower of rain, in a field near Whitborn, about 3 miles from the ſea. It is ſuppoſed they were taken up by a water ſpout.

It is with great pleaſure we ſtate, on the concurrent teſtimony of ſeveral intelligent travellers, as well as on the authority of various provincial prints, that the preſent appearance of the growing crops in general, affords the conſolatory proſpect of a productive harveſt.—The wheat which appeared thin on the ground two months ago, is now ſo very much mended as to promiſe a fairer crop than was expected. As to the barley, there never was a better proſpect of a general crop in all ſorts of land. The oats are alſoniſhingly altered for the better, ſince the late rains; and the fens promiſe great abundance. Beans and peas have rarely been a better crop. It is impoſſible to ſay what the produce of hops may be, but at preſent they ſtand very fair. The ſevere froſt of laſt winter, followed by the hot weather which we have now had for ſome weeks paſt, will, in all human probability, add to the fertility of the land for ſome years to come.

George Wells and Benjamin Ruſſels, ſhopkeepers, of Hadleigh, have each been convicted in the mitigated penalty of 5l. for ſelling men's hats, made of ſtraw, without ſtamps, to which they are equally liable with any other hats.

Laſt week arrived here, having a licence from Government, a French clergyman, the Rev. Monſ. Derochery De Saint Victor, B. D. a man of family.—He lodges at the houſe of Mr. Aram, tailor, in Caſtlegate. The regiments of militia, in general, both in this country and Ireland, have ſupported their character in volunteering their ſervices into regiments of the line—As inſtances of this, of the Nottinghamſhire regiment, 300 have turned out; of the Berkſhire, about 400; Royal Buckinghamſhire, 320; South Hants, 190; the Weſt Suffolk, and Angleſea regiments turned out almoſt to a man.

In conſequence of taking an emetic ſometime in the courſe of June laſt, a young lady that came to Buxton for the benefit of her health, and who labouted under a very uncommon complaint, parted with a live newt three inches and a quarter long, which is preſerved in ſpirits, and kept for the inſpection of the curious, at a ſurgeon's, in Bakewell.

A few days ago, a male baſtard child was found dead in a well at Cheſterfield; an inquiſition was taken upon the body, and a verdict of wilful murder returned againſt the mother, Ann Wright, who was thereupon committed to Derby county gaol, to take her trial at the next aſſizes.

A ſubſcription is opened at Mancheſter for the grand naval pillar propoſed to be erected to perpetuate the victories of the Britiſh navy.

A god-father and two god-mothers laſt week appeared at the old church, Mancheſter, at the chriſtening of a girl, whoſe dimenſions exceed credibility—the two ladies weighing 16 ſcore each, and the gentleman, a reſpectable patten-maker of that town, 16 ſcore 14 pounds!

The ſtorm of thunder and lightning on Tueſday ſe'nnight was accompanied with ſuch a ſhower of hail, that it broke 670 panes of crown glaſs in the garden of Ralph Dodſworth, Eſq. of Crakehall, near Bedale.

On Wedneſday ſe'nnight a violent thunder ſtorm, accompanied by heavy rain, came on at Maſham, in the north-riding of Yorkſhire. Two men, a woman and three children, were in a cottage adjoining ſome lime-kilns, which was ſtruck by the lightning, and one of the children, a little boy, inſtantly killed; another of the children had his ſhoulders much ſcorched; and the father, who had the third child on his knee, had his ſhoes torn off his feet, and was rendered rather lame; he was not otherwiſe hurt, and the child, his wife and the man who was with them, received no material injury.

Two boys, ſuppoſed to be brothers, were found drowned on Monday morning in the Duke of Bridgewater's canal, in Hulme.

An elderly *man*, with a *wooden leg*, who works at the ſlate-quarries in Buttermere, has offered to *run* any man in the kingdom, of whatever *age, weight*, or *ſize* (and for any ſum that the propoſer is able to ſtake) with only one reſervation in his favour;—that is, that he ſhall be allowed to *thuſe his ground*. This *allowance* will certainly not be thought too great, when the mutilated condition of the challenger is conſidered; and ſeveral gentlemen, who have had ocular proofs of his *agility*, have declared their inclination to *back* him, for a very conſiderable wager.

Hull, Auguſt 5. A meeting of the merchants and ſhip-owners was held here on Wedneſday, in conſequence of ſeveral merchants in London having petitioned the Privy Council for permiſſion to import the produce of Ruſſia into this kingdom in *neutral ſhips*; when a memorial was agreed to be ſent to his Majeſty's Privy Council, pointing out the ill conſequences that would ariſe to the owners of ſhips in this kingdom, was Ruſſian produce permitted to be brought to this country in any other than Britiſh ſhips; and ſtating, that the memorialiſts had been induced to inveſt much property in ſhipping, relying on the navigation acts, which prohibit the importation of any goods into England in any other than Engliſh bottoms, or in the ſhips of that European nation of which the goods imported are the genuine growth and manufacture; and they alſo ſtated their opinion that the ſhips already employed, together with 18,000 tons of ſhipping recently returned from the Greenland and Davis' Straits fiſheries, are capable of bringing home all the goods intended to be imported into this kingdom from Ruſſia: and that the employing of neutral ſhips would be prejudicial to the mercantile and ſhipping intereſt of this kingdom, and affect, to an alarming degree, that nurſery for Britiſh ſeamen, the Baltic trade.

The ſhips for Lisbon and Oporto ſailed from this port on Thurſday laſt, under convoy of the Viper, for Spithead, to join the general convoy there.

The outward bound ſhips at Spithead, for Portugal, the Weſt Indies, &c. are all detained by orders from the Admiralty, till ſome account is received of the combined fleets.

The trade that was expected to ſail the 5th of July from hence for the Baltic, ſailed under convoy of the Ariadne on Thurſday laſt.

Thurſday laſt, the Ceres, Maſterman, from Oporto, with wines, had the misfortune, when coming into this harbour, to take the ground, and on the ebbing of the tide, the ſell over, carried away her maſts and filled with water: By great exertions the was got into the Dock on Friday evening. The cargo, we hear, has received no very material damage.

Thurſday ſe'nnight died at Beccles, aged 90, the Rev. Rob. Lemari, Rector of Ellough and Knoddiſhall, in Suffolk.

Thurſday and Saturday laſt the Leiceſterſhire militia, commanded by the Duke of Rutland, marched into Bury St. Edmund's, on their route from this place and Walſoken to Colcheſter barracks.

On Wedneſday laſt an order was received for eight troops of the King's dragoon guards, in barracks at Ipſwich, to hold themſelves in readineſs to embark for foreign ſervice.

On Monday part of the 5th regiment of foot arrived at Newmarket, in their way to Ipſwich, but about one o'clock on the ſame day an expreſs arrived to countermand their route, being immediately ordered to go to Canterbury; the baggage was accordingly ſent in 11 waggons, about ſeven o'clock that evening, and the ſoldiers ſet off in 12 more waggons, at three o'clock the next morning, as they were required to be at that city on Wedneſday.

The great Trigonometrical Survey of England, which was began by Captain Ray, is continued by Capt. Mudge and Mr. Dalby, and they have now a ſtation at Bowbrickhill church, in the county of Bucks.

At Magdalen fair, Norwich, on Friday laſt, there was but a ſmall ſupply of one meal cheeſe, owing, it is ſuppoſed, to the farmers being engaged in the hay harveſt; a few wheys were ſold from 5l. 5s. to 5l. 12s. but many were left on hand, as the moſt reſpectable dealers in that city would not purchaſe at ſuch exorbitant demands. We hope by this determination of the buyers, and the very great quantity of Dutch cheeſe now in Yarmouth, that the preſent extravagant prices will ſoon be reduced.

Fleming and Windham were executed on the Caſtle-hill, Norwich, on Saturday laſt, purſuant to their ſentence at the laſt Thetford aſſizes, for a rape on R. Beighton.—The former has left a widow, only 18 years of age, with an infant child, to lament his ſhort life and it's deplorable termination.
