

## How to play OS Map symbol bingo

1. Choose someone to be the bingo caller. The caller has the set of flashcards, shuffled, with symbol side face down.
2. The remaining players receive a bingo card, with 16 OS symbols in the squares, plus a handful of small blank card squares.
3. The caller picks up the first flashcard, shows everyone the symbol, whilst calling out the name of the symbol. The caller places the flashcard symbol side up on the table.
4. If a player has the symbol on her card, she covers it up with a small card square.
5. The first player to cover up all her cards wins, and becomes the next caller.
6. The caller should check that the winner has covered the right cards.
7. For the next round, players swap cards and the flashcard pile is shuffled again.
