The summer triangle  
Can you name the stars?

# Answers

1. Ursa Major: Great Bear or The Plough. Seen all the year round.
2. Cassiopeia: the Queen of Aethiopia. Seen all year round.
3. Cygnus: The Swan. Best seen in late summer. The brightest star is Deneb.
4. Cepheus: the King of Aethiopia. Seen all the year round.
5. Boötes: the Herdsman. Seen in Spring. The brightest star is Arcturus.
6. The summer triangle
  - a) Deneb (constellation Cygnus)
  - b) Vega (constellation Lyra)
  - c) Altair (constellation Aquila)

Now look on the star map and see if you can find the constellations.
