Gaywood Valley
Conservation Group
Salters Sanctuary
4th September 2017
Photos with thanks to Ian
Pathway becoming overgrown with nettles
Is that a bread tray which Andy found during his litter picking?
Nettle growth in one of the glades in June
The same glade on 4th September
A number of harvestmen (Opiliones) were observed in the nettles.
Hard at work on these nettles
Not many of the nettles remaining
One of the glades where there had been very little nettle growth
The horseradish keeps on growing
Steps after clearing away the encroaching vegetation
