

Notice of Highway Condition Surveys

October & November 2018 | www.hs2.org.uk

High Speed Two (HS2) is the new high speed railway for Britain.

What are we doing?

In late October and early November 2018, we will be doing Highway Condition Surveys on selected roads in Warwickshire. These surveys will assess the condition of the roads proposed as HS2 construction vehicle routes. To obtain comparable data, we are also surveying some roads that are not planned to be used by HS2 construction vehicles.

How will this affect you?

We will be using the following survey methods on these selected roads.

Falling Weight Deflectograph (FWD) Surveys

These surveys use a special vehicle that will stop for 10 to 15 minutes along selected roads to measure the strength of the highway. The vehicle will drop a small weight on the road surface and take measurements. We won't be closing any roads we survey, but we will use stop and go boards to manage traffic flow.

Coring Surveys

These surveys will be undertaken using a small core drill to take soil samples, which will allow us to identify the material used to construct the road. Drilling will be limited to a few minutes per core sample and we won't be closing the roads we are surveying, but we will use stop and go boards to manage traffic flow.

We will undertake further engagement at any locations where local residents may experience any impacts from these works.

We will keep noise within agreed limits, minimise disruption and ensure safety is maintained during these works.

If you have a question about HS2 or our works, please contact our helpdesk on 08081 434 434 or email HS2enquiries@hs2.org.uk
