

HAY MEADOWS

Thursday 19 September 2013

A training course for volunteers, residents and the local community

Tutor: Sue Everett of Flora locale

Learn about the life and wildlife of hay meadows, and their harvesting. How can meadow habitats be restored using different cutting techniques, seed or plant plugs? What are the best methods for creating new meadows and wild-flower grasslands?

Those who wish to gain further experience will be able to participate in community planting events at Masons Field in the early autumn.

The venue for the course is Roe Green Walled Garden, Roe Green Park, Kingsbury NW 9 9HA:

<http://www.bhcg.btck.co.uk/RoeGreenWalledGarden>

and with the option of a visit to Masons Field and Fryent Country Park.

The course commences at 10am and will complete by 4pm – if you need to leave earlier just let us know. Tea, coffee and biscuits will be available but please bring a lunch or there are local shops on Kingsbury High Road. The course is open to everyone, though places are limited.

To book, please telephone or contact Barn Hill Conservation Group, telephone: 020 8206 0492.

The course is funded as part of the of the Heritage Lottery Fund project to restore Masons Field in partnership with Brent Council.
