5. Correspondence

6. Sub -committee Reports

6.1 Finance - JD

6.2 House - KW

a. Cladding: Whilst removing facia at end of building for replacement, it was discovered that the boards under the plastic cladding have rotted away. Graham was called to look at it. We agreed that a temporary repair should be made before replacing the facia.

One thing when cladding wooden buildings , no one knows what is happening underneath. In the long term the cladding will have to be removed for further investigation and repairs carried out were necessary.

b. Water cooler :As you are aware the cooler was sent for repair. It was found that the thermostat had been tampered with. The other day I had complaints that it wasn't working again. I found that the water had been turned off. Who is touching any parts of this machine, and why?
