

He gave us eyes to see them and lips that we may tell

SUSTAINABILITY: The Mudzini Kwetu home is blessed with a well-cultivated farm area; livestock, with chickens, turkeys and cows; and a fish farm. The food products from these are being used at the home and some are sold to the community. They are trying to breed catfish as well as tilapia fish. Every year we visit, a new calf is born. This summer, Bedwas the cow gave birth to Olympia. The Bio gas system is now working in all the buildings so that cooking can be done safely, cheaply and is environmentally friendly.

PRESENTATION: Cariad Kenya is part of the Wales Africa Community Links. They commended us for 'involving communities to make poverty history through inspiring and practical action.' Staff and children from Mudzini were due to visit Wales this year but unfortunately they were not allowed visas. However, the WACL are allowing us to carry forward the grant so that they will come next year.

SECURITY: There have been reports in the media recently that there were security issues in Mombasa. Mudzini has not been affected by the violence in part of the Coastal District. We would covet your prayers for peace in Kenya, especially with the elections in a few months time.

ASANTE SANA: The young people at Mudzini wish to thank you for your generosity. You have given so much, over many years, in helping with their development and giving them opportunities for their future life. You can see and hear them on our web site—www.cariadkenya.btck.co.uk

Cariad Kenya Trustees thank all those who are supporting Cariad Kenya and the Mudzini Kwetu Centre in working with International partnerships to transform the lives of vulnerable children.

All things bright and beautiful

'Greetings to you. We, at Mudzini, pray that you are fine. Each of us is well and we are grateful to God for all the good things, including life, health, goodness, rain, sunshine and fruitful seasons. He has continually watched over all of us, answered our prayers and given us grace and strength to keep on going on.' Catherine

There are no complaints about the rain in Kikambala! They have been a blessing in order for the maize, vegetables and other crops to grow.

All creatures great and small

A family of sisters aged between fifteen months and ten years joined Mudzini in June. They were malnourished and bewildered when they arrived but are now making good progress. We thank God for an opportunity to make a difference in these lives.

A young girl who is the youngest of four siblings, lost her parents a while ago. Her brother had been taking care of them and he had been moving the children to wherever he could find a job. This was destabilising their education and social lives. The elder children were placed in other homes and this young girl was brought to Mudzini. Yet another opportunity to make a difference in a life. Thanks very much for helping to do this.

Another sad story is of a baby rejected and abandoned. However, because of your love and support, she has a home for now. The baby was collected from Mtwapa Police Station when she was only eleven days old but she is now very healthy at four months. God bless you for the good work that enables these things to happen.

Recent news of the youngest children is that Joy is now walking; Somo and Rose are running and learning to talk. We are grateful for all their various developments.

All things wise and wonderful

SCHOOL: Gift, Riziki, Jane Big and Kimberley have only been able to return to high school recently. Government school teachers and university lecturers have gone back to work following a strike.

Fortunately, John Maina, the new principal of the forthcoming Mudzini Kwetu School has started work at the home and is giving tuition to the girls, as well as supervising the preparation of the syllabus for this school.

In November, Zawadi will be sitting her final examinations to enter high school. Brenda will be starting university in the new year. We wish them well.

HOLIDAY BIBLE CLUB: As this was an Olympic year, the theme was 'Sports Academy'. It was a wonderful time of learning new truths about

running the race of life. There were plenty of activities for spirit, mind and body, using truths from the Bible, new songs and verses, lots of physical

exercise with the emphasis on the Kenyan sporting culture. The programme concluded with the Mudzini Olympics!

The Lord God Made them all

We visited Dr Said who was recovering from a serious road accident. He told us that he was helped by 'a good Samaritan' who took him to hospital. Dr Said is very grateful for all those who prayed for him in the UK at such a difficult time. He is an invaluable help to the Mudzini children and staff with his medical advice.

Ian Williams, one of our Trustees, visited in May to assist the Mudzini staff and monitor how Cariad Kenya's resources are used. Sandie Baker, a retired mid-wife, went with Ian and she was able to train the house mothers in baby care and child development.

We are pleased that Susan Rivers is a new Trustee. She has been involved with Cariad Kenya for many years when she was in senior management at Bedwas High School.
