

Three Steps to Avoiding Zombie Viral Infection

By Brian Kinsella and Patrick Egan

UMAREX BOYS CLUB

2013

1. AVOIDANCE

All zombie infestations render the location uninhabitable. The citizen's first duty is to vacate the area and proceed immediately to an authorized Rescue Station. Duly authorized Z.E.R.O. personnel will manage relocation -- but, the key to an effective evacuation is **COMPLETE AVOIDANCE OF HAZARDOUS CONDITIONS** while en route.

EVACUATE

Gather family and essential small valuables only. **DO NOT** attempt to secure or defend property or possessions.

RELOCATE

Proceed immediately to the Rescue Station assigned to your area. In the absence of Z.E.R.O. Relocation Management personnel, monitor local radio broadcasts for directions.

DO NOT ENGAGE!

It is critical to remember that any zombies encountered during relocation are **NOT** family or friends but **REANIMATED CORPSES INFECTED WITH A DEADLY CONTAGION**. Under **NO** circumstances should you engage one in any kind of interaction. Contagion is transmitted via a bite, and **ANY** interaction with a zombie results in repeated attempts to bite.

IN THE EVENT OF A BITE...

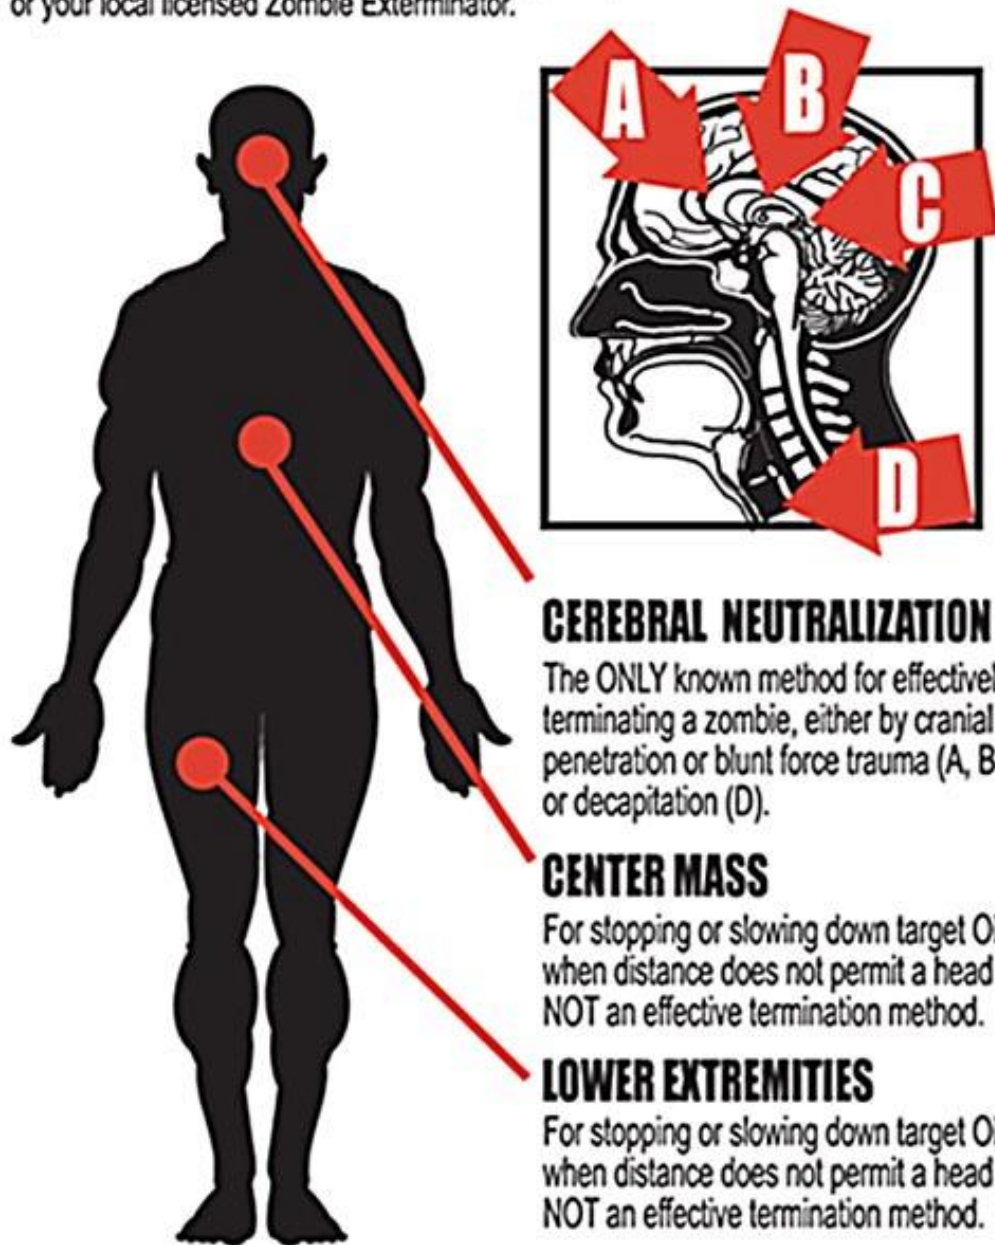

Apply pressure to the wound with padding found in the supplied **BITE KIT** until proper medical supervision can be accessed.

IF THE WOUNDED INDIVIDUAL EXPIRES after being bitten, **VACATE THE PREMISES IMMEDIATELY** or execute guidelines found in next section.

2. TERMINATION

Engage this step only if in an unsecured location, and ONLY if you have positively identified a zombie by using the Zombie Classification Cards (supplied). Otherwise, any terminations should be referred to and executed by a duly authorized member of Z.E.R.O. or your local licensed Zombie Exterminator.

CEREBRAL NEUTRALIZATION

The ONLY known method for effectively terminating a zombie, either by cranial penetration or blunt force trauma (A, B, C) or decapitation (D).

CENTER MASS

For stopping or slowing down target ONLY when distance does not permit a head shot. NOT an effective termination method.

LOWER EXTREMITIES

For stopping or slowing down target ONLY when distance does not permit a head shot. NOT an effective termination method.

3. DISPOSAL

"TAPE & TAG"

After terminating the zombie(s), mark the perimeter to enable Z.E.R.O. Disposal Unit personnel to locate the remains and ship to a Mobile Acid Disintegration (M.A.D.) unit for disintegration. This can be completed in two simple "Tape & Tag" steps:

1. Mark area surrounding the remains with an appropriate length of CAUTION: ZOMBIE OUTBREAK ZONE tape (supplied).
2. Attach a FORM 2BD tag (supplied) to the toe of the corpse.

DO NOT INCINERATE!

Incineration releases airborne toxins which spread infection to the uninterred deceased or, in areas of heavy humidity or precipitation, the recently interred deceased. This exponentially increases infestation levels.
