

Preston-Ormskirk Passenger Count Summary up to May 5th 2014

The exercise was conducted between December and May with most of the counts between late January and end of March. Counts were undertaken on all services through the day except the first out of Preston and last out of Ormskirk. With limited counts on a Saturday they were excluded from the results and statistics.

Loading per service averages 30.5 with highest loadings invariably between Croston and Preston or Preston and Croston, and Burscough Junction and Ormskirk.

Average number of passengers per service is 32.5

Daily total of journeys excluding first and last services ranges between 720 and 780 Monday – Friday which extrapolated can be reconciled with the annual traffic figures quoted of circa 217k and trend growth.
