

Funny Bob Doubles (Peter. S. Bennett)

Plain Bob is rung up to the point where the treble leads for the second time.

The treble *then makes seconds over the 3.*

The 3 leads, *does not make seconds* and then runs out again to make seconds on the following lead.

This has the effect that-

The 4 makes long fifths every lead.

The two dodges down every lead.

The five dodges up every lead.

NB. Note that the bells pass the treble in different positions on alternate leads.
