

A bell set at 'hand-stroke'

The stay holds the bell upright, with the slider blocked at the left. The rope goes over the pulley and along the bottom of the wheel and is tied through the wheel at '8 o'clock'. The striped sally will be within the reach of the bell ringer below

Diagrams by John Gough of Napton on the Hill

A bell set at 'back-stroke'

The stay now holds the bell upright, with the slider blocked at the right. The rope goes straight past the pulley and around the top of the wheel and is still tied to the wheel at '8 o'clock'. The sally will now be at ceiling height, beyond the reach of the bell ringer
